## SOFTWARE ENGINEER

---

Experienced in Java (Spring - Boot), Ruby on Rails, and JavaScript-based programming.  
Passionate about code and strong skills include working in a team-oriented setting, leadership skills, problem solving, reliability, adaptability, with open-mind and willing to learn anything.

## TECHNICAL SKILLS

---

Java (Spring boot), Ruby on Rails, Python (Django), JavaScript, React, TypeScript, MySQL, PostgreSQL, MongoDB, HTML, CSS

## TECHNICAL PROJECTS

---

Movie-Nuggets – [Frontend](#) | [Backend](#) | [Demo](#)

An IMDB type of application that allows the user to watch movie trailers and leave reviews.

Back-End: Java (Spring boot), Front-End: React with Material UI and Bootstrap

MongoDB: Populates the movies from server and allows user to create reviews.

Coffee-Stand – [Frontend](#) | [Demo](#)

A beautiful landing page for a coffee delivery company using mostly HTML and CSS. The application demonstrates my understanding of styling a beautiful website.

## EDUCATION

---

Western Governors University (Bachelor's in Science - BS, Computer Science)

May 2022 – June 2023

Flatiron Coding Bootcamp (Immersive Software Engineering – Manhattan NY)

Jan 2020 – Jun 2020 Cohort

Southern New Hampshire University (Computer Science – No degree)

Jan 2019 - August 2020

## WORK EXPERIENCE

---

### **Apprentice Now** - Application Development Apprenticeship (Java Intensive – Remote)

July 2022 - Sept 2022 Cohort

- 8 Week intensive coding course, that show student's computer fundamentals, and how to program in Java Full stack.
